

RFA Card

Product Description

The RFA can be widely used in SDH, DWDM and other long-distance transmission system, not only can amplify the optical signal, but also can improve the system's OSNR. It is specially designed for ultra-long span, large capacity and high rate transmission system.

Product Features

- Low noise figure
- High integration
- High reliability
- High gain and low power consumption
- High security with intelligent automatic shutdown function

Product Specification

Parameter	Index
Operation wavelength	1550.12±0.4nm
Input optical power	-50~-10dBm
ON/OFF gain	20dB
Noise figure	-3dB
Insertion loss	2.5dB
Card width	2 standard slots
Maximum power consumption	50W
Connector type	LC/UPC
